A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
The email address is suspicious, and is inconsistent given the name "Clyde West". Secondly, a known malicious file hash was found in this email from the provided line, which was also noted as a medium severity. Next, though the email says there is a password protected resume and cover letter, the file attached is "bfsvc.exe", not a pdf. Finally, the email body and subject line contain grammatical errors. Given all of this, I chose to escalate to Tier 2.

Additional information

Known malicious file hash:

54e6ea47eb04634d3e87fd7787e2136ccfbcc80ade34f246a12cf93bab527f6b

Subject: Re: Infrastructure Egnieer role

Dear HR at Inergy,

I am writing for to express my interest in the engineer role posted from the website.

There is attached my resume and cover letter. For privacy, the file is password protected. Use the password paradise10789 to open.

Thank you,

Clyde West
